1. Introduction

The purpose of this document is to provide a comprehensive overview of the project's objectives, scope, and deliverables. It is intended for the project sponsor and key stakeholders.

The project will be managed using a hybrid approach, combining agile practices for development and waterfall for testing and deployment. The project manager will be responsible for overall coordination and reporting.

The project budget is estimated at \$1,200,000, with a total duration of 18 months. The project will be executed in three phases: discovery, development, and deployment.

The project team consists of 15 members, including a project manager, business analyst, software developers, and quality assurance specialists. The project will be supported by a steering committee and a project steering group.

2. Objectives

The primary objectives of the project are to deliver a high-quality, scalable, and secure web application that meets the business requirements and user expectations.

The project will be managed using a hybrid approach, combining agile practices for development and waterfall for testing and deployment.

The project team consists of 15 members, including a project manager, business analyst, software developers, and quality assurance specialists.
